

Thank you!

Dear Consumer,

July 1, 2022, marks the 20th anniversary of BRPL 'Powering Delhi and Empowering Consumers'. Coincidentally, this momentous occasion coincides with 75 years of India's independence. In these two-decades, BRPL has emerged as a modern power distribution company, supplying reliable and uninterrupted power to over one-crore residents in South and West Delhi.

Since 2002, it has reduced AT & C losses from 51.2% in 2002 to ~ 7%, a record reduction of ~44%, catapulting it to the league of leading discoms globally. By FY 23-24, over 50% of BRPL's power portfolio will be green, making it one of the greenest discoms in the country. Committed to sustainability, it is also spearheading the solar roof-top and EV revolutions in Delhi.

BRPL is also leading the digital charge. Today, a consumer can avail a BRPL service or make a bill payment from the comfort of his/her home by using platforms like WhatsApp, BRPL Mobile App, BSES Website, Chat-Bot, E Wallets, Net Banking, Credit/ Debit Card and UPI. There is no need to visit a BRPL office.

We wouldn't have come this far in our journey without your support and encouragement. A big thank you! With your continuous support, we will strive to constantly improve on our deliverables and services.

Regards
Team BRPL

Go solar for just Rs 23,400* per kW

In a short span, BRPL has energised over 3500 rooftop solar connections – with a connected solar load of around 100 MW – in South and West Delhi. Consumers across categories, including residential and CGHS, have warmed up to roof top solar net metering in big-way. It is an ideal method to reduce electricity bills and also do your bit for the environment.

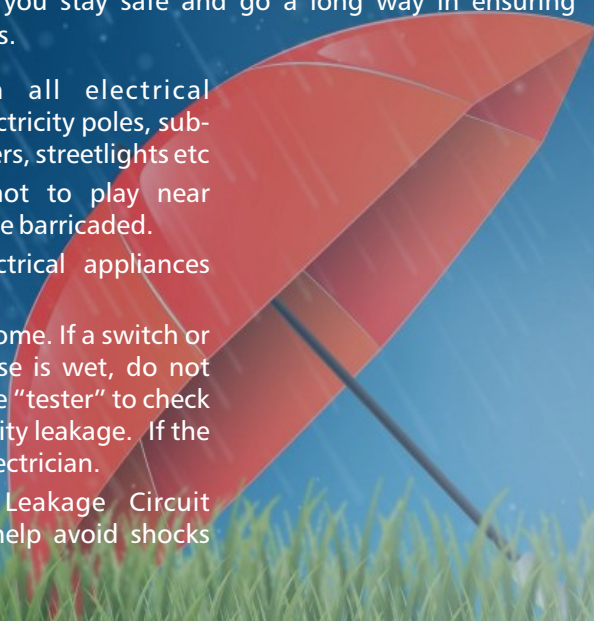

Now, a residential consumer can get a Government subsidy of upto 40% for going-solar. For details on rates and vendors & expressing your interest, please visit www.solarbSES.com. You can also call 19123 (option 9).

**Price per kW for upto a 3 kW connection; excluding GST*

Follow simply tips to stay safe during the rainy season

Much to everyone's delight, Monsoons are here again! With them, Monsoon also brings with itself, its own set of unique problems and issues due to water-logging. Chances of electricity related mishaps and incidents are especially high during the monsoon season. Simple precautions will help you stay safe and go a long way in ensuring incident free monsoons.

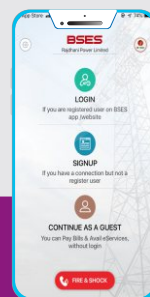

- Stay away from all electrical installations like electricity poles, sub-stations, transformers, streetlights etc
- Caution children not to play near them, even if they are barricaded.
- Do not touch electrical appliances with wet hands
- Keep a "Tester" at home. If a switch or a wall of your house is wet, do not touch it. First use the "tester" to check if there is an electricity leakage. If the need be, call your electrician.
- Install an Earth Leakage Circuit Breaker (ELCB) to help avoid shocks and mishaps.

OUR MOBILE APP GETS EVEN MORE POWERFUL.

IT'S NOW THE 'BRPL POWER APP!'
