

Safety Alert:

Maintain distance from electrical installations for your own safety

Large scale construction activity is taking place in Delhi. Many of these dwellings and unauthorized constructions / extensions – built in various colonies have come underneath and dangerously close to discom' existing overhead Low Voltage (LV), High Voltage (HV) and Extra High Voltage (EHV) lines and electricity installations. These are in complete violation of Regulation 62 and 63 of the Central Electricity Authority. (Measures relating to Safety and Electric Supply) Regulations, 2023 ("CEA Safety Regulations, 2023"), read with Section 53, 68(5) and Section 161 of Electricity act 2003, as amended from time to time.

Building extensions, structures, projections, balconies, chajjas or boundary walls etc must maintain a minimum vertical and horizontal distance from the electricity mains and electricity installations, as stipulated in the regulations.

Lines / Installations	Minimum vertical clearance where line is passing above a building / structure / balcony etc.	Minimum horizontal clearance where line is passing adjacent to a building / structure / balcony etc.
Lines of voltage upto 650 Volts	2.5 metres from the highest point	1.2 metres from the nearest point
High Voltage line exceeding 650 Volts up to and including 11000 Volts	3.7 metres from the highest point	1.2 metres from the nearest point
High Voltage line exceeding 11000 Volts and upto and including 33000 Volts	3.7 metres from the highest point	2 metres from the nearest point
Extra High Voltage line exceeding 33 KV	3.7 metres (Plus 0.30 metres. for every additional 33000 Volts or parts thereof)	2 metres (Plus 0.30 metres. for every additional 33 KV or part thereof)

These rules have been framed for your safety, to avoid any mishap, fatal accidents and power disruptions.

BSES once again appeals to the owners of such unauthorized constructions to immediately remove their illegal and unauthorised constructions from near the electricity mains and installations. Violators of the stipulated regulations will be held personally responsible for any direct or indirect loss (life, property etc) and liable for prosecution as per applicable laws.

Illuminating Dreams: BRPL's New Training Center Lights the Way for Visually Impaired

At BRPL, we are committed to more than just reliable electricity; we are empowering the youth's dreams. Our new vocational training center in Najafgarh is dedicated to visually impaired youth aged 16-35. This program offers a 6-month comprehensive training in various courses like Computer Software, Data Entry, MS Office and English for competitive exams.

We go beyond training; each participant receives mentorship from experienced professionals. We are proud that about 60 individuals, mainly from West Delhi, have joined us in this transformative journey at BSES. Reflecting our ethos, we also introduced Braille electricity bills earlier this year.

Accelerating Delhi's Green Drive: BSES Facilitates Setting-Up of > 3000 EV Charging Points in Delhi at > 1000 locations

By facilitating the installation of over 3000 EV charging points across over 1000 convenient and accessible locations under 'private', 'public', and 'captive' categories, BSES is helping Delhi's EV revolution shift into high gear. Together, let's drive Delhi towards a sustainable and pollution-free tomorrow.

	Public	Private	Captive
No of points	1305	1252	484
No of locations	378	440	324
