FOLLOW SIMPLY TIPS TO STAY SAFE DURING THE RAINY SEASON

Much to everyone's delight, Monsoons are here again! With them, Monsoon also brings with itself, its own set of unique problems and issues due to water-logging. Chances of electricity related mishaps and incidents are especially high during the monsoon season. Simple precautions will help you stay safe and go a long way in ensuring incident free monsoons.

- Stay away from all electrical installations like electricity poles, substations, transformers, streetlights etc
- Caution children not to play near them, even if they are barricaded.
- Do not touch electrical appliances with wet hands
- Keep a "Tester" at home. If a switch or a wall of your house is wet, do not touch it. First use the "tester" to check if there is an electricity leakage. If the need be, call your electrician.
- Install an Earth Leakage Circuit Breaker (ELCB) to help avoid shocks and mishaps.

Advisory related to Electricity meters issued in public interest

Your electricity meter is safe, but remember, it is a complex device. Therefore, some precautions related to electricity meters are a must. You can keep you and your family safe following the advisory issued by BSES in public interest:

- No electrical or mechanical equipment should be installed near the electricity meters/ installations.
- The place where meter is installed should be clean and kept free from any garbage, inflammable material or debris for safety and ease of access.
- Avoid parking vehicles near electricity meter or any electrical installation which can make the area unsafe as the fuel in the vehicle would aggravate fire. Also, these installations should be kept free from any encroachment.
- Consumer should take care for ensuring that areas where meters are installed should be kept properly ventilated, free from contaminants and exhausts gases from any process which might lead to conditions causing fire incidents.

Don't let your guard down in the fight against Covid-19!

Just because the restrictions have once again started to ease, does not mean that the danger of Covid is over. It is not. Measures to stay safe that were true a few months ago still provide safety from Covid. For complete protection, take precautions even after vaccination!
