

Go solar for just Rs 23,400* per kW!

In a short span, BYPL has energised over 815 rooftop solar connections – with a connected solar load of around 30 MW – in East and Central Delhi. Consumers across categories, including residential and CGHS, have warmed up to roof top solar net metering in big-way. It is an ideal method to reduce electricity bills and also do your bit for the environment.

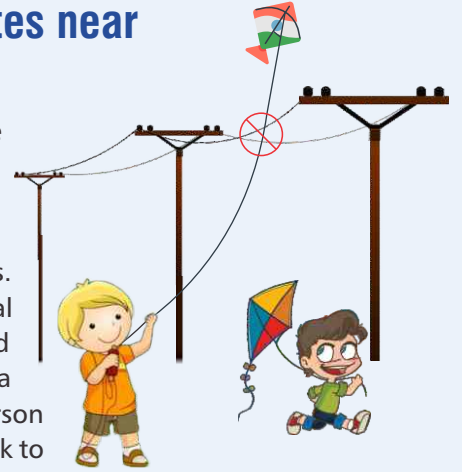

Now, a residential consumer can get a Government subsidy of upto 40% for going-solar.

For more details, please call 19122.

*Price per kW for upto a 3 kW connection; excluding GST

Stay Safe: Don't fly kites near electric installations

Kite flying is an integral part of the Independence Day celebrations in India. Sometimes this otherwise innocuous activity can be hazardous, even fatal at times. The wide-spread use of metal coated manjha – being a good conductor of electricity – poses a great danger not only to the person flying the kite, but also poses a risk to the electricity supply of an area.

- Metal coated manjha can lead to trippings and even electrocution
- Tripping of just one 33/66 KV overhead line can disrupt power supply to over 10,000 residents of an area and tripping of a single 11 KV line to over 2500 residents
