HARNESS
Solar energy is the most easily and readily available source of renewable and non-pollutant source of energy. A 1 Kilowatt home solar system will generate approximately 1600 Kilowatt hours per year in a sunny climate and prevent 300 lbs of Carbon dioxide being released into the atmosphere and water heaters the optimum.

A woman in a black blazer and white saree is smiling and presenting a gift to a woman in a dark blue blazer and patterned saree. They are standing in front of a group of schoolgirls in blue uniforms.

A group of schoolgirls in blue uniforms are standing in a line, looking towards the camera. One girl in the foreground is looking directly at the camera with a serious expression. Other girls are visible behind her, some looking towards the camera and others looking away.
